An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 17, delete line 3 in it's entirety and replace with: --masterbatch comprising a polyamide and conductive carbon black, said conductive carbon black being present in the form of at least one agglomerated particle having a major axis of 20 to 100 m, wherein the number of said at least one agglomerated particle is 1 to 100 as observed under an optical microscope with respect to a contiguous area of 3 mm<sup>2</sup>--.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Garth Dahlen on 1/24/05.

The following is an examiner's statement of reasons for allowance:

The prior art of record, including the references cited on the search report from PCT/JP03/09104, do not disclose or inherently meet the claimed masterbatch composition/method. Specifically, the prior art of record does not disclose carbon black being present in the form of at least one agglomerated

particle having a major axis of 20 to 100 m, wherein the number of said at least one agglomerated particle is 1 to 100 as observed under an optical microscope with respect to a contiguous area of 3 mm<sup>2</sup>. With respect to any obviousness rejection(s), it appears the prior art teaches away from the claimed compositions/methods by teaching the desirability of homogeneous, non-agglomerated dispersion of carbon black. Additionally, applicant has shown through direct comparative example that the claimed materials/methods possess superior and unexpected results compared to materials outside the scope of the instant claims (see examples/comparative examples in the instant specification).

The remaining reference(s) cited on form PTO-892 are considered state of the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Kopec whose telephone number is (571) 272-1319. The examiner
